How to Setup Your Unit

What You Need

- (2) Individuals
- (1) Step Stool
- (1) Power Drill

Follow these steps and reference images provided for each

Step 1

- (1) Individual with step stool lifts awning up

Step 2 & 3

- While holding awning in up position, the 2nd individual brings wall panels outward towards the center of the unit.

Step 4

- Once wall panels have been moved you can rest the awning on the panels

Step 5

- Locate 2" foam block provided in unit

Step 6

- While on the step stool, raise the awning and place the 2" foam block between the wall panels and awning. The awning should now be resting on the 2" foam block. While on the step stool push the awning towards the unit, locking the fasteners in the back position (reference image in Step 9). Make sure both sides of the awning are in the back position.

Step 7

- Locate the awning support arm on the side of the unit.
- Locate bag with fasteners in storage cabinet.

Step 8

- Line Up awning support arm with holes and secure with fasteners. Do this on both sides of the unit.

Step 9

- Make sure brackets are secure and remove 2" foam block.
